

Egregio Dottore,

Abbiamo il piacere di presentarLe il programma scientifico del prossimo Stage di Perfezionamento in:

***CURRENT CONCEPTS IN AMERICAN DENTISTRY :  
Aesthetics and Oral Rehabilitation***

che si svolgerà presso il New York University College of Dentistry dal prossimo **31 maggio 2011**.

La New York University, la più grande Scuola privata di Odontoiatria degli Stati Uniti, organizza con successo da 30 anni gli **Stage di Specializzazione** dedicati a dentisti stranieri. Questi Stage, della durata di una settimana l'uno, sono articolati in lezioni teoriche, laboratori, esercitazioni pratiche, video, etc. che insegnanti del College of Dentistry della NYU o Relatori di fama espressamente invitati preparano e svolgono su diversi temi odontoiatrici.

Gli Stages sono a numero chiuso e sono organizzati con un servizio di **TRADUZIONE IN ITALIANO**, dando così la possibilità di seguire le lezioni anche a chi non parla correntemente la lingua Inglese.

La New York University rilascia un attestato di partecipazione alla fine di ogni settimana di lezioni. Al termine del Programma completo di frequenza a sei settimane di Stage (almeno 4 seguite negli U.S.A.) e la presentazione del FINAL WRITTEN REPORT su due casi clinici trattati, viene rilasciato ai partecipanti ***l'International Achievement Certificate in IMPLANTOLOGY & ORAL REHABILITATION***.

La quota di iscrizione allo STAGE è di €**2.300** ed è comprensiva di : tasse universitarie, materiali di laboratorio e didattici, coffee-breaks, pranzi.

***PROGRAMMA DI VIAGGIO e QUOTE DI PARTECIPAZIONE***

*Naturalmente l'occasione di studio è anche di vacanza essendo la New York University situata sulla centralissima First Avenue a Manhattan, proprio nel cuore della Grande Mela! Sarà così per Lei possibile visitare agevolmente New York e familiarizzare con questa città unica al mondo.*

Per la prenotazione di viaggio ed alloggio le suggerisco di provvedere QUANTO PRIMA alla prenotazione per mezzo dei diversi siti disponibili sul web (Expedia.it – Volagratis – Last minute, etc.) che le potranno offrire una

ampia gamma di proposte. In generale un volo diretto (Delta o Alitalia) dall'Italia e ritorno, prenotato per tempo, costa dai 350,00 ai 500,00 €, un buon Hotel a Manhattan dai 200 ai 300 € per notte: sono anche disponibili molte offerte a pacchetto completo volo+hotel. Per ogni ulteriore informazione ci potrà contattare in segreteria al numero 3339553450.

**New York University College of Dentistry  
Linhart Continuing Dental Education Program**

***Stage di Perfezionamento in  
“Current Concepts in American Dentistry: Aesthetics and Oral Rehabilitation”  
May 31 - June 3, 2011 (Tuesday-Friday)***

**Tuesday, May 31, 2011 ..... 9:00 a.m. – 4:30 p.m.**

**Dr. Michael SONICK**

Former Assistant Clinical Professor of Surgery, Yale School of Medicine; Guest Lecturer for CDE International Programs at New York University College of Dentistry; Editorial Board for Compendium of Continuing Dental Education, Functional Esthetics and Restorative Dentistry, Inside Dentistry, Dental XP, and Journal of Implant and Advanced Clinical Dentistry; Founder and Director of Fairfield County Dental Club and Sonick Seminars; Member, American Academy of Periodontology; Private Practice of Periodontics and Dental Implants, Fairfield, Connecticut.

***“Implant Treatment in the Aesthetic Zone”  
(9:00 a.m. – 3:30 p.m.)***

*Implant dentistry is now part of routine dental treatment. It is no longer enough for an implant to merely osseointegrate; it must be esthetic as well. The maxillary anterior dental implant is perhaps the most challenging for the clinician. A multiplicity of techniques must be mastered including but not limited to ideal implant placement, proper surgical technique, bone augmentation, soft tissue development and proper restoration.*

**CASE PRESENTATIONS  
(3:30 p.m. – 4:30 p.m.)**

**Wednesday, June 1, 2011 ..... 9:00 a.m. – 4:30 p.m.**

**Dr. Robert LOWE**

Visiting Lecturer, Continuing Dental Education Programs at New York University College of Dentistry; Former Assistant Professor of Operative Dentistry at Loyola University School of Dentistry in Chicago, Illinois; Fellow, Academy of General Dentistry, International College of Dentistry and Academy of Cosmetic Dentistry; Private Practice in Charlotte, North Carolina.

***“Predictable Techniques for Total Esthetics”  
(9:00 a.m. – 3:30 p.m.)***

*In today's rapidly changing environment of dental materials and techniques, it is important that the dentist be knowledgeable and current. It is equally important to consistently deliver optimal results to our patients using techniques that are proven and reliable. The purpose of this course is to demonstrate in a detailed step-by-step fashion, procedures that if practiced can impact your ability to deliver an improved level of dental artistry in your practice tomorrow.*

- **Direct Anterior Posterior Composite Restorations**

*Techniques to create lifelike and morphologically precise anterior and posterior direct composite restorations will be demonstrated in step-by-step detail. The use of composite restorations will be shown to create characterized restorations that rival those produced in the laboratory. Techniques to create predictable proximal contacts will be shown using sectional matrix techniques.*

- **Advanced Indirect Techniques for the Aesthetic Restorative Practice to Achieve "World Class" Results**

- Methodical Tooth Preparation for Predictable Esthetic Excellence

*Tooth Preparation (the use of negative space) is probably the single most critical step to restorative excellence. With the different materials available today, it is important that the dentist understand the space requirements for each, so that the least amount of tooth structure be removed to obtain the desired result.*

- The Art and Science of Provisional Restorations and Impression Making

*Step-by-step techniques will be shown to carve morphologically precise provisional restorations chairside. The use of various provisional materials and indications for their use will be discussed. The use of retraction medium will be shown and techniques to get an accurate final impression the first time, every time will be virtually guaranteed.*

- Functional and Aesthetic Reconstructive Therapy

*Complex restorative cases can involve a multidisciplinary approach to predictably*

**CASE PRESENTATIONS**  
(3:30 p.m. – 4:30 p.m.)

**Thursday, June 2, 2011** ..... **8:30 a.m. – 3:30 p.m.**

**Dr. Cyril EVIAN**

Clinical Professor and Former Acting Chairman of the Department of Periodontics, University of Pennsylvania School of Dental Medicine; Past Director of Graduate Periodontics and Implantology at the University of Pennsylvania; Diplomate, American Board of Periodontology; Private Practice Limited to Periodontics, Implantology and TMJ Disorders in Philadelphia, Pennsylvania.

**"Surgical Techniques to Maximizing Aesthetic Results"**

(8:30 a.m. – 12:00 noon)

**TREATMENT PLANNING SESSION**

(1:00 p.m. – 2:30 p.m.)

**CASE PRESENTATIONS**

(2:30 p.m. – 5:30 p.m.)

## COCKTAIL RECEPTION

(5:30 p.m. – 6:30 p.m.)

**Friday, June 3, 2011** ..... **8:30 a.m. – 1:00 p.m.**

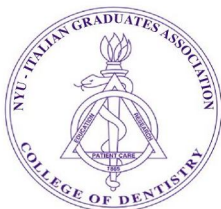

### **Dr. Ross NASH**

Former Clinical Instructor, Medical College of Georgia School of Dentistry, Augusta, Georgia; Guest Lecturer, Baylor College of Dentistry, Dallas, Texas; Diplomate, American Board of Aesthetic Dentistry; Fellow, American Academy for Cosmetic Dentistry; Co-founder and President, Nash Institute for Dental Learning in Charlotte, North Carolina; Private Practice in Cosmetic and General Dentistry in Charlotte, North Carolina.

### ***"Total Esthetics - From Single Restorations to Full Mouth"***

*Today's society demands esthetics as well as function and health treatment from dentists. With modern materials and procedures, we can provide excellence in all three areas. In this program, Dr. Nash will illustrate the use of esthetic materials for all types of clinical situations including full mouth rehabilitation. Actual clinical cases will be used to show techniques for giving the patient what they desire in esthetics and what we are responsible for in the treatment of dental disease and for oral rehabilitation. Principles of occlusion and smile design will be integrated into the discussion which will cover everything from single restorations to full mouth reconstruction.*
